you to attend a
class on:

Preparing your Facility for Fire Door Inspections

LS201

Heard about the fire door inspection requirement as prescribed by NFPA 80, 2016 Edition? Know what you need to do when the requirement is adopted by your local building code? If you would like a little help in getting ready, join us for this class. Focusing on swinging doors and their corresponding fire door hardware, this class will assist you as your facility plans for how it will comply with these important fire life safety requirements.

Course Length: 1 day

Topics Include:

- NFPA 80, 2016 edition inspection requirements for swinging fire doors
- The job of a fire door assembly
- What items—at minimum—must be inspected and verified
- Common code violations
- Solutions for common code violations
- Documentation and other details

Upon Completion Of This Course, You Will Be Able To:

- Describe the requirement to inspect fire doors as prescribed by NFPA 80, 2016 edition
- Define the required parts of a fire door assembly and the purpose these components serve
- Explain the importance of maintaining and inspecting fire doors
- Refer to the list of the 13 items that, at minimum, must be verified for their proper operation
- List ways to correct common code violations
- Propose potential next steps to help prepare your facility

Who should attend:

Facility and maintenance personnel, contract hardware distributors and locksmiths, architects, AHJ's and fire marshals
